Question 1
                          RBI issues all national banks to collect interest on all customer loans.
                          Create an RBI interface with a variable String parentBank="RBI" and abstract method rateOfInterest()
 Marked out of
                          RBI interface has two more methods default and static method.
5.00
                          default void policyNote() {
Flag question
                          System.out.println("RBI has a new Policy issued in 2023.");
                          static void regulations(){
                          System.out.println("RBI has updated new regulations on 2024.");
                          Create two subclasses SBI and Karur which implements the RBI interface
                          Provide the necessary code for the abstract method in two sub-classes
                          RBI has a new Policy issued in 2023
                          RBI has updated new regulations in 2024.
                          SBI rate of interest: 7.6 per annum.
                          Karur rate of interest: 7.4 per annum
                          For example:
                           Test Result
                                  RBI has a new Policy issued in 2023
                                   RBI has updated new regulations in 2024.
SBI rate of interest: 7.6 per annum.
Karur rate of interest: 7.4 per annum.
                           Answer: (penalty regime: 0 %)
                           1 // Define the RBI interface
                                     interface RBI {
    // Variable declaration
    String parentBank = "RBI";
                                          double rateOfInterest();
                                          // Default method
                                         default void policyNote() {
    System.out.println("RBI has a new Policy issued in 2023");
}

Question 2 Marked out of

Flag question

Create interfaces shown below interface Sports { public void setHomeTeam(String name); public void setVisitingTeam(String name);

interface Football extends Sports {

public void homeTeamScored(int points); public void visitingTeamScored(int points);} create a class College that implements the Football interface and provides the necessary functionality to the abstract methods. sample Input Rajalakshmi Saveetha

Rajalakshmi 22 scored Saveetha 21 scored Rajalakshmi is the Winner!

22 21

Test	Input	Result
1	Rajalakshmi Saveetha 22	Rajalakshmi 22 scored Saveetha 21 scored Rajalakshmi is the winner!

Answer: (penalty regime: 0 %)

```

Passed all tests!

Question 3 Correct Marked out of 5.00 Flag question

```
create an interface Playable with a method play() that takes no arguments and returns void. Create three classes Football, Volleyball, and Basketball that implement the
Playable interface and override the play() method to play the respective sports.
interface Playable {
```

```
void play():
class Football implements Playable {
 String name
  public Football(String name){
    this.name=name;
 ) ()vslq biov oilduq
  System.out.println(name+" is Playing football");
```

Similarly, create Volleyball and Basketball classes.

Sadhvin is Playing football

Sanjay is Playing volleyball

Sruthi is Playing basketball

For example:

Test	Input	Result
1	Sadhvin Sanjay Sruthi	Sadhvin is Playing football Sanjay is Playing volleyball Sruthi is Playing basketball
2	Vijay Arun Balaii	Vijay is Playing football Arun is Playing volleyball Balaii is Playing basketball

```
Answer: (penalty regime: 0 %)
```

Test	Input	Expected	Got
1	Sadhvin	Sadhvin is Playing football	Sadhvin is Playing football
	Sanjay	Sanjay is Playing volleyball	Sanjay is Playing volleyball
	Sruthi	Sruthi is Playing basketball	Sruthi is Playing basketball
2	Vijay	Vijay is Playing football	Vijay is Playing football
	Arun	Arun is Playing volleyball	Arun is Playing volleyball
	Balaji	Balaji is Playing basketball	Balaji is Playing basketball

Passed all tests!
